! ACHTUNG

ELEKTRISCHER ANTRIEB. NICHT FÜR KINDER UNTER 3 JAHREN GEEIGNET. ERSTICKUNGSGEFAHR DURCH VERSCHLUCKBARE KLEINTEILE. BEINHALTET ZUBEHÖRTEILE MIT SCHARFEN KANTEN. DARF NUR UNTER AUFSICHT EINES ERWACHSENEN BEDIENT WERDEN. LANGE SCHNUR. STRANGULATIONSGEFAHR. SCHUTZBRILLE VERWENDEN.

- Geeignet für Kinder ab 8 Jahren
- Mit Unimat können verschiedene Gerätevarianten zusammengestellt werden
- Unimat ist ein mittels 14,4V Gleichstrommotor angetriebenes Gerät. Besondere Sorgfalt und Aufmerksamkeit sind somit angebracht
- Mit jeder der Aufbauvarianten kann man sich bei unsachgemäßer Handhabung verletzen
- Auf ein sauberes Arbeitsumfeld achten
- Vor Gebrauch von Unimat Bedienungsanleitung sorgfältig lesen und sich mit den Bauteilen der Produkte vertraut machen
- Beim Zusammenbau der Geräte Schritt für Schritt der Bedienungsanleitung folgen. Die Anleitung enthält wichtige Informationen und muss sorgfältig aufbewahrt werden
- Wenn Unimat montiert, zwischen den Gerätevarianten gewechselt oder das Gerät gereinigt wird, IMMER vorher das Gerät vom Stromnetz trennen
- Unimat darf nur mit dem beigeckten 14,4V Netzteil verwendet werden
- Das 14,4V Netzteil ist KEIN Spielzeug
- 14,4V Netzteil nicht im Freien betreiben! Vor Feuchtigkeit schützen!
- 14,4V Netzteil an der Ausgangsseite niemals mit anderen Transformatoren parallel schalten! Bei Beschädigung an Anschlussleitung, Stecker oder Gehäuse darf der Transformator nicht mehr weiter benutzt werden! Überprüfung und Anchluss der Geräte liegen in der Verantwortung der Aufsichtspersonen
- Eingespanntes Werkstück kann sich beim Arbeiten lösen
- Immer überprüfen, ob Werkzeug bzw. Werkstück fest eingespannt ist
- Niemals in rotierendes Werkzeug greifen
- Niemals in rotierendes Werkstück (Drechselhölzer etc.) greifen!
- Aufpassen, dass weder offene Kleidung (Ärmel etc.), noch Haare in die Nähe von rotierendem Werkzeug oder Werkstück kommen
- Unimat darf nur für beschriebene Arbeitsvorgänge verwendet werden
- Für Unimat nur Weichholz (Balsa, Linde, Pappel, Sperrholz...) verwenden
- Anfallenden Holzstaub mit dem Staubsauger entfernen
- Vor dem geplanten Projekt mit Holzresten üben, um ein Gefühl für das Arbeiten mit Holz zu bekommen

Sollte ein Teil in dieser Packung fehlen oder defekt sein, so fordern Sie es bitte bei uns kostenlos an. Bitte nicht die Packung einsenden. Nur Absender und Teile-Nr. (siehe Stückliste der Bauanleitung) angeben bzw. das Teil beschreiben oder skizzieren. Bei technischen Teilen, wie beispielsweise Motoren, bitten wir Sie, uns diese zur Reparatur bzw. aus Gründen der Qualitätsicherung einzusenden. Der Inhalt kann je nach Vertriebsland variieren. Die Konformitätserklärung finden Sie unter: <http://www.thecooltool.com/rechtlisches/>.

! WARNING

ELECTRIC TOY. NOT SUITABLE FOR CHILDREN UNDER 36 MONTHS. SMALL PARTS CAN BE SWALLOWED AND CAUSE RISK OF SUFFOCATION OR CHOKING. LONG CORD, STRANGULATION HAZARD. SHARP FUNCTIONAL EDGES AND POINTS, CUTTING HAZARD AND PUNCTURING HAZARD. TO BE USED UNDER THE DIRECT SUPERVISION OF AN ADULT. USE SAFETY GOGGLES.

- Suitable for use by children aged 8 years and older
- With Unimat you can setup different functions powered by a 14.4V DC motor
- Special care and attention are required when using power tools. Each machine can cause severe injuries if handled improperly. The machines are supplied with sharp tools. Handle these with caution to avoid injury
- Before using Unimat, read through the entire instruction manual and familiarize yourself with the parts of the product
- Follow all instructions and precautions carefully
- Instructions for parents are included and must be observed. The manual must be retained since it contains important information
- The 14.4V adaptor/power supply is not a toy
- Never connect the 14.4V adaptor output in parallel with other power supplies! If electrical cable, plug or case of the power supply is damaged discontinue using Unimat immediately! The supervisor bears the responsibility for checking and hooking up the devices
- Be sure to ALWAYS disconnect plug from the power supply before assembling, changing from one tool to the another and cleaning with liquids. As with all electric products, precautions should be taken during handling and use to prevent electric shock
- Unimat must only be used with the included 14.4V adaptor
- Do not use 14.4V adaptor outdoors! To be kept dry
- Do not abuse Unimat or use it for tasks other than the tasks described in this instruction manual
- The workpiece can fly out of the chuck when being used
- Always make sure that the tools and workpieces are properly secured
- Never touch the revolving workpiece with any part of your body
- Keep hair and clothing well away from moving parts
- Keep workplace clean and tidy
- Do not use Unimat with any material other than wood. Soft wood recommended (balsa, bass wood, poplar plywood)
- Keep Unimat in good working order by removing accumulated wood dust with a vacuum cleaner
- Practice with scrap pieces of wood before starting a project. This will help to get the feeling of working with wood for better results

Should any part in this box be defective or missing, please send your request to us for a free replacement. Do not send the box. Just your name and address, the part number (see spare parts list of the assembly manual) or a small drawing. Please send us any technical parts such as motors, for repair and quality assurance reasons. The content may vary in different countries. Declaration of conformity: <http://www.thecooltool.com/en/legal/>.

! ATTENTION

MOTEUR ÉLECTRIQUE. NE CONVIENT PAS AUX ENFANTS DE MOINS DE 36 MOIS. DANGER D'ÉTOUFFEMENT. PRÉSENCE DE PETITES PIÈCES SUSCEPTIBLES D'ÊTRE INGRÉÉES. DANGER DE STRANGULATION. PRÉSENCE D'UNE LONGUE CORDE. PRÉSENCE DE BORDS FONCTIONNELS COUPANTS DANGEREUX. PRÉSENCE DE POINTES FONCTIONNELLES ACÉRÉES: À UTILISER SOUS LA SURVEILLANCE TRÈS RAPPROCHÉE D'UN ADULTE ! UTILISEZ LES LUNETTES PROTECTRICES.

- Unimat est construit pour les enfants plus de 8 ans
- Unimat est une système modulaire pour 4 fonctions différentes entraînées par un moteur 14,4V courant continu
- PlayMat est équipées d'outils tranchants et peuvent dans certains cas provoquer des coupures graves
- Ce produit est un outil puissant, c'est pourquoi nous vous recommandons prudence et attention lors de son utilisation.
- Avant d'utiliser Unimat assurez-vous d'avoir lu entièrement la notice d'utilisation et de vous être familiarisé avec les différentes parties constituant la machine. Ne pas respecter ces instructions peut exposer les utilisateurs à des risques de blessures ou coupures
- Veuillez par ailleurs à suivre toutes les instructions à la lettre
- Ne laissez jamais travailler les enfants sans surveillance!
- TOUJOURS vérifiez que la prise du transformateur est débranchée lors des changements d'outils et autres émontages et les nettoyez avec des fluides
- Unimat ne doit être utilisé qu'avec le 14,4V transformateur inclus
- Le transformateur n'est pas un jouet et ne doit pas être utilisé à l'extérieur
- Ne pas sortir du cadre des utilisations pour lesquelles Unimat est destiné
- Nous vous rappelons que Unimat est exclusivement destiné au travail du bois (recommandé: balsa, tilleul, peuplier). Vous ne devez pas utiliser d'autres matériaux
- L'outil en place peut être projeté hors de la machine en cours de travail.
- Vérifiez toujours si l'outil et la pièce à usiner sont solidement serrés!
- Ne touchez jamais l'outil en rotation
- Ne touchez jamais une pièce en rotation (bois de tournage...)
- Veillez à tenir éloignés de l'outil ou de la pièce en rotation les vêtements lâches (manches ...) et les cheveux
- La place d'utilisation doit rester propre
- Poussière et copeaux de bois ne doivent pas nuire au bon fonctionnement de Unimat, veillez donc à les évacuer régulièrement avec le moyen de votre choix

S'il manquait une pièce dans cette boîte ou si un accessoire était défectueux, veuillez nous demander son remplacement. Ne retournez pas la boîte, mais indiquez le numéro de la pièce (voir liste des pièces détachées du mode d'emploi) ou décrivez ou dessinez-nous la pièce. En ce qui concerne les pièces techniques, par exemple moteurs, nous vous demandons, pour des raisons de garantie de qualité, de nous les envoyer pour réparation. Le contenu peut varier en différents pays. Déclaration de conformité européenne: <http://www.thecooltool.com/en/legal/>.

Avertissements

¡AVISO!

MOTOR ELÉCTRICO. INADECUADO PARA NIÑOS BAJO DE 3 AÑOS.
PARTES PEQUEÑOS INCLUIDOS PUEDEN SER UN RIESGO DE ASFIXIA. LOS PARTES ACCESORIOS INCLUYEN PARTES PUNTIAGUDOS Y PARTES CON RIESGO DE CORTAR. SOLAMENTE DEJA USAR DEBAJO DE LA SUPERVISIÓN DE UN ADULTO. RIESGO DE ESTRANGULACIÓN CON EL CABLE DE ELECTRICIDAD. ¡UTILIZAR GAFAS PROTECTORAS!

- Adecuado para niños de 8 años y más
- Con Unimat se pueden construir 4 máquinas diferentes
- Unimat está una máquina accionada con un motor 14,4 V corriente continua. Por eso siempre trabajan con atención
- Con cada máquina está posible de dañar en el caso de usado incorrecto
- Antes de usar Unimat leer todas las instrucciones y familiarizar con todas las partes del producto
- Durante el montaje siempre cumplir las instrucciones del manual paso a paso. El manual incluye informaciones importantes y necesita de estar conservado apropiadamente
- Durante el montaje de Unimat, el cambio entre los diferentes tipos de máquinas o la máquina esta limpiado, SIEMPRE! desconectar la máquina de la red eléctrica
- Unimat solamente debe usar con el conector de 14,4V incluido
- ¡El conector de 14,4V NO es un juguete!
- ¡El conector de 14,4V no puede usar en el exterior! Proteger el conector contra humedad!
- El conector de 14,4 V nunca puede ser conectado con otros transformadores en un circuito paralelo. En el caso el cable eléctrico, el conector o la casa del transformador está dañado no puede usar el transformador más. El usuario tiene la responsabilidad de controlar y conectar el producto
- La herramienta fijada puede desprenderse de la máquina durante el trabajo
- ¡Siempre conviene controlar si la herramienta y el material están fijados adecuadamente!
- ¡ Nunca tocar el material que está rotando (madera para tornear, ...)
- ¡Prestar cuidado a que indumentaria o cabello suelto no se hallen demasiado cerca de la herramienta y del material!
- Con cada una de las máquinas corre peligro herirse al servirse de ellas inadecuadamente
- Unimat solamente puede ser usado para los procesos explicados en el manual
- Para Unimat solamente usa madera blanda (madera de balsa, tilo, contrachapado de álamo,...)
- Como todas las máquinas, también Unimat debe ser limpia y lubricada regularmente
- Antes de empezar con un proyecto realiza un corte de prueba en un trozo de madera de desecho

En caso de faltar alguna pieza o de resultar defectuosa, rogamos efectuar el reclamo correspondiente a la dirección indicada sin costos adicionales. Por favor no mande el paquete. Solamente describa o diagrame la parte o indica su dirección y el número en la misma (véase la lista de piezas y las instrucciones de armado). Si fuese necesario efectuar una reparación, y por motivos del control de calidad, sírvase remitir al fabricante las piezas técnicas tales como los motores. El contenido puede variar dependiendo del país. Declaración de conformidad:

尾座行程: 15 mm

变压器

输入电压110-240 V AC, 50-60 Hz
输出电压14.4V直流电，输出电流2A .

机器

木材车削:
中心高25 mm
中心距135 mm
线锯:
锯条行程: 4mm
锯台面: 100 x 100mm
砂磨机:
砂轮盘直径: 49 mm

INDIVIDUAL PARTS

Headstock U2

Spindlenose: M12x1
Hole through spindle: 8 mm
Gear rim: 23 and 60 teeths
2 ballbearings

Longitudinal slide U9EDU*

Travel: 50 mm
Motor U4

12 V direct current
Power input up to 2 A
Gear rim: 12 teeths

Nom. rpm.: 20,000 rpm

Tailstock U6

M12x1
Travel of tailstock sleeve:
15 mm

Technical data

informaciones técnicas

PIEZAS SUELTAS

Cabezal U2

Saliente: M12x1
Paso de la barra: 8 mm
Engrane: 23 y 60 dientes,
2 baleros sellados y engrasados

Carro longitudinal U9EDU*

Recorrido de desplazamiento:
50 mm

Motor U4

12 V Corriente continua
Energía absorbida hasta 2 A
Engrane: 12 dientes
Revoluciones: 20.000 rpm

Contrapunta U6

M12x1
Carrera de pinol: 15 mm

ОТДЕЛЬНЫЕ УЗЛЫ

Шпиндельная бабка U2

Присоединительная резьба: M12x1
Внутренний диаметр: 8 мм
Зубчатые шкивы: 23 и 60 зубьев
2 шариковых подшипника

Салазки U9EDU (продольный суппорт)*

Перемещение: 50 mm

Двигатель U4

12 В, постоянный ток
Потребляемый ток: до 2 А
Ведущая шестерня: 12 зубьев
Скорость вращения: 20.000 об/мин

Задняя бабка U6

Присоединительная резьба: M12x1
Перемещение пиноли: 15 mm

Технические данные

Adaptor

prim. 110 - 240 V, 50 - 60 Hz,
sek. 14.4 V direct current, 2A.

MACHINES

Woodturning lathe

Centre height: 25 mm
Distance between centres:
135 mm

Jig-saw

Stroke of saw-blade: 4 mm
Table size: 100 x 100 mm

Sanding machine

Diameter of the sanding disc:
49 mm

Transformador

prim. 110 - 240 V, 50 - 60 Hz,
seg. 14,4 V corriente continua,
2 A.

MAQUINAS SUELTAS

Torno de madera

Altura de puntos 25 mm
Distancia entre puntos 135 mm

Sierra de calar

Carera de la hoja: 4 mm
Superficie de mesa:
100 x 100 mm

Máquina esmeriladora

Diámetro del disco: 49 mm

Трансформатор

Первичное напряжение: 110-240 В,
50-60 Гц
Вторичное напряжение:
14,4 В, постоянный ток 2 А.

СТАНКИ

Токарный станок

Высота центров: 25 мм
Расстояние между центрами: 135 мм

Лобзик

Ход пилки: 4 мм
Размер рабочего стола: 100 x 100 мм
Шлифовальный станок
Диаметр шлифовального диска:
49 мм
